

## Year End Collage Project

You will be creating a collage to reflect on your learning in **ONE** of the units we studied this year. The units of study are: Plants, Cells, Matter, Waves (light and sound) and Weather.

A collage is a series of graphic images that follow a theme. The images you use can come from a variety of sources: Hand drawn magazines and downloaded from internet. The images should flow together to make one large picture.

Requirements:

1. Title : Top center with name and date in right hand corner
2. At least **15 separate images** that display your theme (Unit of study)
3. Attached explanation that clearly explains how every item in the collage is related to the theme.

Planning is critical. Make sure all of your images flow together and there is not an abundance of blank, white space.
