

Cell	Basic unit of life
Eukaryote	A cell that contains a nucleus and membrane bound organelles
Multicellular	Made up of more than one cell.
Organ	group of tissues that work together to perform closely related functions
Organelle	A tiny cell structure that carries out a specific function within the cell
Organism	A living thing
organ system	group of organs that work together to perform a specific function
Prokarote	a single celled organism that has no nucleus or cell membrane
Tissue	A group of similar cells that perform the same function.
Unicellular	Made of a single cell
